

1

ADDITIVE FOR RUBBER ELASTOMERS

2

ABSTRACT OF THE DISCLOSURE

3

An additive/process aid for polymeric materials  
4 such as rubber elastomers comprises a mixture of gray  
5 slate flour, corn starch, a liquid polyester resin or  
6 an epoxy resin, calcium carbonate and silica gel or a  
7 fatty acid. The additive/process aid facilitates the  
8 processing and enhances the physical properties of the  
9 rubber elastomer.
